Terms of Use

These Terms of Use ("Terms") govern your access to and use of the Finna website (the "Website") and any services made available through it. By accessing or using this Website, you agree to be bound by these Terms.

Finna provides access to licensed node software that may be utilized by individuals who independently install, host, and operate such software in connection with decentralized blockchain infrastructure networks. Finna acts solely as a commercial reseller of software licenses and does not operate, manage, or control any decentralized blockchain network.

Software License Access

Access to node software through Finna provides a limited license to utilize such software in accordance with applicable technical specifications. Users are solely responsible for installing, configuring, hosting, securing, and maintaining their own node infrastructure. Participation in decentralized network operations may require ongoing system uptime, technical configuration, and adherence to applicable network standards or community governance processes.

Finna does not provide node hosting services, infrastructure management, or operational oversight of independently installed systems.

Blockchain Integration

Node software licensed through Finna is designed to interact with decentralized blockchain networks that operate through distributed participation by independently operated nodes. Network performance, governance, transactional validation, and protocol-level outcomes are determined through decentralized processes and are not directed or controlled by Finna.

Users acknowledge that blockchain networks are independently maintained by distributed participants and that Finna does not have authority over protocol rules, validator selection, digital reward distribution mechanisms, or network-level governance decisions.

Digital Rewards

Certain decentralized networks may distribute protocol-level digital rewards to independently operated nodes based on measurable operational performance such as uptime or validation activity. Any such digital rewards are determined solely by decentralized network rules and are not issued, guaranteed, or controlled by Finna.

Affiliate Participation

Users participating in affiliate or reseller programs may be eligible to receive commissions denominated in fiat or government-issued currency for the sale of licensed software products in accordance with applicable program terms.

Customer Participation

Individuals may choose to engage with Finna either as a customer by purchasing a license to independently install and operate node software for participation in decentralized network infrastructure, or as an affiliate who promotes licensed software products in accordance with applicable program terms. Customers who license node software are responsible for independently installing, hosting, and maintaining their systems in order to support decentralized network operations, while affiliates may be eligible to receive commissions in fiat or government-issued currency for product referrals, as outlined in the applicable affiliate agreement.

Limitation of Liability

Finna shall not be responsible for:

- Independent node operation or performance
- Network availability or reliability
- Protocol-level digital reward mechanisms
- Blockchain network governance decisions
- Digital asset volatility
- Third-party infrastructure providers

Use of licensed node software in connection with decentralized networks is undertaken at the user's own discretion.

Jurisdictional Use

Access to the Website and associated services may not be available in all jurisdictions. Users are responsible for ensuring compliance with applicable local laws in connection with their use of licensed software.

Modifications

Finna reserves the right to update or modify these Terms at any time. You can contact us at support@finna.com.
